

Curricular Overview of Cognitive Science at Oswego

The BS Degree in Cognitive Science is a strict superset of the BA degree in Cognitive Science. This fact affords two advantages to students: (1) Students enrolled in the BA Degree program who like what they are doing, particularly the computational component, can transition to the the BS Degree without feeling like any of their work was for nought, and (2) Students enrolled in the BS Degree program who are struggling with the final requirements can simply adjust their enrollment status to BA Degree, and (mixed emotions aside) their graduation tends to be a rather relaxed process.

And/Or Graph for the Major Requirements
