# Csc344, Spring 2022, Special Note Pertaining to CSA

This little note is simply intended to give you a means by which to get in contact with CSA, the Computer Science Association at Oswego. CSA has a very long (roughly four decades) tradition of helping computer sciences students with issues they may be having with respect to their computer science work.

I thought the best way to do this might simply be to share a slightly edited (to make it more readable to you) portion of the email message that the president of CSA sent my way last night:

```
Good evening professor Graci,

We have a discord channel that helps students with
questions and also just a place to hang out with
the other cs majors.

Can you write this link on the board or email the class:
https://discord.gg/NcHmf9Bq
It's the discord channel that the CSA has.

Thank you,
Gregory Maldonado
```
